

PAARTH ASRI

Cybersecurity | Testing, Vulnerability Research & Security Operations

Delhi, India | +91 96432 37915 | paarthasri96@gmail.com | [linkedin.com/in/paarth-asri](https://www.linkedin.com/in/paarth-asri) | github.com/PaarthAsri

SUMMARY

Cybersecurity professional with hands-on exposure across testing, vulnerability research, and security monitoring. Currently in enterprise test automation at Infosys, with independent experience disclosing 10+ validated web application vulnerabilities (SSRF, stored XSS, IDOR, subdomain takeover) via HackerOne and Bugcrowd, and SOC-side experience monitoring SIEM telemetry and triaging alerts. Comfortable moving between finding issues, understanding how they're detected, and explaining both clearly. ISC2 Certified in Cybersecurity (CC); CEH in progress.

EXPERIENCE

Infosys Limited - Systems Associate (IQE / Automation Tester)

Jul 2025 - Present

Bengaluru, India - SAP EAM integration testing for a US-based client

- **Designed security-focused test cases** covering input validation, session handling, and access-control checks across enterprise SAP EAM workflows.
- **Automated 100+ test cases in Java/Selenium WebDriver** across 5+ interconnected modules and third-party APIs, reducing manual testing effort ~40% per release.
- **Authored structured defect reports** with clear reproduction steps and impact framing, contributing to ~20% faster defect resolution.
- **Extending automation coverage with UFT One** (Eclipse IDE) integrated into Jenkins CI/CD pipelines for scheduled regression runs.

DigiSuraksha Parhari Foundation - Cybersecurity Intern

Apr 2025 - May 2025

Delhi, India

- **Monitored Splunk and Microsoft Sentinel** SIEM dashboards in a simulated enterprise environment, reviewing logs for auth failures, port-scans, and anomalous DNS across 50+ endpoints.
- **Triaged 20+ alerts weekly**, distinguishing true from false positives using contextual log analysis, and mapped confirmed activity to MITRE ATT&CK tactics (Initial Access, Credential Access, Persistence).
- **Gained exposure to adversary techniques** alongside detection (Metasploit, BeEF, Bettercap, SQLmap, Wireshark/PCAP analysis), reviewing 20+ incident scenarios weekly from both sides of the workflow.

SECURITY PROJECTS

Independent Bug Bounty Research

2025 - Present

- **10+ validated vulnerabilities disclosed** via HackerOne, Bugcrowd, and direct vendor programs, including blind SSRF (DNS-callback confirmed) on a cloud vector-database snapshot endpoint, stored XSS via unsanitized alias input, and a subdomain takeover, earning paid bounties.
- **Built an automated recon pipeline** (subfinder, httpx, nuclei) plus manual testing in Burp Suite and OWASP ZAP to map attack surface across production targets.
- **Authored vendor-ready reports** with PoC steps, impact assessment, and remediation guidance; currently extending research to blockchain node targets (java-tron).

JWT Security Auditor - Python CLI Tool

- **Built a CLI tool** to flag insecure JWT algorithm configuration, missing/invalid claims, excessive token lifetimes, and sensitive data exposure, with signature verification and dictionary-based weak-HMAC-secret testing.
- **Structured JSON/HTML reporting** with severity classification and remediation guidance.

Security Monitoring & Incident Response Home Lab

- **Built a Windows detection lab** (Security Event Logs, Sysmon) covering brute-force auth, scheduled-task persistence, and suspicious PowerShell, building attacker techniques and then detecting them.
- **Wrote 7 custom SIEM correlation rules**, improving alert fidelity ~35% over baseline.

TECHNICAL SKILLS

- **Security Testing:** Burp Suite, OWASP ZAP, Nmap, Metasploit, Nessus, OpenVAS, Kali Linux, subfinder/httpx/nuclei recon pipeline
- **Monitoring & Detection:** Splunk, Microsoft Sentinel, Sysmon, Wireshark/PCAP analysis, alert triage
- **Frameworks & Standards:** OWASP Top 10, MITRE ATT&CK, authN/authZ and JWT/session security
- **Programming & Automation:** Python, Java, JavaScript, Bash, Selenium WebDriver, Jenkins
- **Platforms:** Linux (WSL2/Kali), Windows, VMware, VirtualBox

CERTIFICATIONS & EDUCATION

Certifications: ISC2 Certified in Cybersecurity (CC) • Certified Ethical Hacker (CEH), In Progress

Education: Bachelor of Computer Applications (BCA), CGPA 8.67/10, Vivekananda Institute of Professional Studies, Delhi

2022 - 2025
